

International Journal of Value Chain Management (IJVCM)

Introduction: Pressures of competitive forces have enhanced production process changes, supercharged by shortening product/technology development lifecycles, decreasing delivery times, reducing inventories and increasing customer satisfaction. Today's complex, globalized organizations focus on procurement, technological development, and infrastructure. Integrating communication and increasing cooperation between production chain members is essential for managing value chains, critical for organizational survival and growth. Progressive organizations should cover physical as well as cyber market space. IJVCM reflects and explores these issues and developments in value chain management.

IJVCM is indexed in Scopus (Elsevier), Academic OneFile (Gale), Asian Digital Library, cnpLINKer (CNPIEC), Expanded Academic ASAP (Gale), etc..

Scope: IJVCM scope covers the following areas.

- Value chain strategies, planning, design, development, analysis, and applications
- Technological interventions in value chains
- Supply chain management, logistics, and distribution channel design
- Agile and lean manufacturing
- Value/relationship management, trust, partnerships, strategic alliances
- Global sourcing, e-procurement, and e-commerce
- Demand forecasting/planning, order fulfillment, quick response time
- Value for customers, clients, partners, and society at large
